“Our **extensive industry experience** and **unmatched reputation** set us apart. The greatest advantage of working with EEG is our team of industry specialists and **insulation experts**, ensuring complete confidence in our services and your project.”

Devin Hall - **Managing Director**

# WHO WE ARE

Since 2013, Energy Efficiency Group (EEG) has been **installing** world-leading **insulation** products in existing homes and new builds.

Backed by a team of 80+ experienced installers EEG provides world-leading **insulation products and services** nationally dedicated to maximising the thermal, acoustic, and energy efficiency of any project.

## RELIABLE **INSULATION** SPECIALISTS

16,000+ Homes Retrofitted

3,500+ Projects Completed

Operating Nationally

Accredited And Trained Insulation Installers

ISO Accredited To Quality, Environmental, and Safety Management

Focused On Sustainability And Environmental Impact

## OUR MISSION

To maximise thermal, acoustic, and energy performance in alignment with project specifications.

## OUR PURPOSE

To deliver comprehensive insulation solutions for residential, industrial, and commercial sectors across Australia, utilising rigorously tested and certified products suitable for Australia's diverse climate conditions.

## OUR VALUES

We support one another like family by building relationships based on reliability and honesty. We uphold ethical standards in all decisions, while staying dedicated to our people, clients, and commitments.

## OUR VISION

To be Australia's most trusted insulation solutions provider while leading the industry in sustainability and quality.

# OUR DIVISIONS

We are a vertically integrated company that delivers tailored solutions for homeowners, builders, and architects to meet the unique requirements of every project.

Operating under **nationally recognised brands**, we ensure quality, sustainability, and energy efficiency at every stage.

**Brisbane Insulation**  
Saving Energy Saving Money

**CAVITY WALL**  
Insulation

# OUR CERTIFICATIONS

WE PUT **QUALITY, SAFETY & ENVIRONMENTAL STANDARDS** TO THE TEST.

Certified to **ISO 14001** Environmental Management Systems, we ensure compliance with legislative and industry requirements.

Certified to **ISO 45001** Occupational Health and Safety Management Standards, we ensure both our staff and customers are protected.

Certified to **ISO 9001** Quality Management Standards, we ensure quality in everything we do.

# OUR ACCREDITATIONS

**eec CERTIFIED**

**insulation  
installer**

Accredited by the EEC, our installers demonstrate their expertise in home insulation upgrades, ensuring they are trusted experts ready to deliver high-standard services.

**Insulation Installation  
Assurance Authority**  
Accredited Installer

Accredited by the IIAA, we provide quality assurance, ensuring insulation is installed correctly and 'fit-for-purpose' backed by a 10-service year warranty.

**HUNTSMAN** APPROVED  
**BUILDING SOLUTIONS**

As approved installers for Huntsman Solutions, our team applies Polyurethane spray foam solutions to high standards across the industry.

**kNAUF**

As approved installers for Knauf Insulation, our staff work with world-leading insulation applications.

# OUR INDUSTRY PARTNERS

As a member of the Australian Modern Building Alliance we stand to represent the use of polymers in the Australian construction industry.

As EEC members we remain at the forefront of energy management to reach net zero.

As members of the peak body for Australia's off-site construction we support the idea of building prefabrication, technology and design.

Through our Master Builders membership, we collaborate with the industry to ensure that policymakers grasp the needs of both homeowners and builders.

As HIA members we have access to a wide range of industry products and business services.

# OUR CAPABILITIES

## 1 EXISTING HOME INSULATION UPGRADES

We specialise in removing outdated insulation and replacing it with high-performance alternatives to boost the efficiency of current homes. With our EEC Certified Installers, we guarantee that homeowners receive upgrades installed to the highest industry standards, using top-quality products.

## 2 RESIDENTIAL AND COMMERCIAL NEW BUILDS

We provide hassle-free, professional services to both developers and builders. Our offerings include supply and installation options for insulation tailored for roofs, ceilings, walls, subfloors, and mid-floors, catering to both new residential and new commercial projects.

## 3 SPRAY FOAM INSULATION SPECIALIST

We specialise in the installation of polyurethane spray foam insulation, carried out by certified applicators. Our energy-efficient options encompass open cell, closed cell, and pour foam applications, suitable for residential, commercial, and industrial projects of varying types and sizes.

## 4 SPECIALISED CAVITY WALL INSULATION

We are a certified installer of Supafil Carbon Plus, a blown-in insulation suitable for wall cavities and hard-to-reach areas. As an accredited installer for Knauf Insulation, we offer this non-combustible glass wool solution that enhances thermal and acoustic performance in modular, commercial, and residential settings.

## 5 EEC ACCREDITED INSULATION INSTALLERS

Our in-house installers are trained and accredited through the EEC certified insulation installer training program, guaranteeing quality and standardised installations that comply with AS3999:2015 when necessary. This rigorous training ensures our team performs to the latest industry standards and best practices.

## 6 TECHNICAL SALES TEAM

With technically trained and highly capable sales representatives we provide advice on thermal, acoustic and energy requirements to ensure project specifications are met.

## 7 ENERGY EFFICIENCY RATINGS

We provide complimentary home energy assessments and bespoke reports including NatHERS energy ratings, blower door air tightness testing, and thermal camera assessments and reports.

## 8 ACOUSTIC SOLUTIONS

We offer high-performance acoustic insulation solutions for residential, commercial, and industrial spaces, aimed at enhancing sound control and reducing noise transmission. Our products include acoustic-rated insulation batts, wall cavity insulation, and aesthetic rigid acoustic boards to improve acoustic comfort.

## 9 TAILORED INSULATION SOLUTIONS FOR EVERY PROJECT

With a diverse array of products and solutions, we guarantee that each item is 'fit for purpose.' All products are tested to meet Australian standards and are installed by skilled professionals, providing you with complete peace of mind.

## 10 HEAT PUMP HOT WATER SYSTEM

We provide top-of-the-line Stiebel Eltron heat pump hot water systems designed specifically for Australian conditions. These systems offer exceptional energy efficiency, substantial cost savings, and remarkably quiet operation. They also integrate flawlessly with solar PV installations, making them an ideal solution for both residential and commercial use.

## 11 PIPE INSULATION WITH SPRAY FOAM

We specialise in pipe insulation using high-performance polyurethane. This solution not only helps maintain precise temperatures—whether keeping pipes warm or cold—but also effectively controls moisture and condensation.

## 12 INDUSTRIAL SOLUTIONS

Skilled in overseeing and implementing insulation solutions for large-scale industrial projects, focusing on energy efficiency, durability, and temperature regulation. By adhering to ISO safety, quality, and environmental standards, we guarantee high performance and sustainability in every endeavor.

# OUR CLIENTS

We are proud to have provided energy-efficient solutions for many organisations and government departments throughout Australia. This is a testament to our success, as demonstrated by our repeat clientele.

## AIRPORT HANGARS, WA

In addition to providing extra moisture protection, our application enhanced the hangar's overall structural strength and longevity, as well as improved the facility's temperature regulation. We applied Pacific Urethanes closed-cell spray foam at a thickness of 48mm to insulate the interior roof and walls of this hangar.

## ST THOMAS SCHOOL, QLD

We successfully supplied and installed 4,695m<sup>2</sup> of R4 Knauf Earthwool Formaldehyde-Free Insulation Batts across 33 buildings at St Thomas More School. Enhancing energy efficiency and comfort throughout the campus, significantly improving the building's thermal performance and decreasing ongoing running costs.

## BRIGHTON PROJECTS, QLD

We provided and installed insulation solutions to aid in the development of 90 to 100 homes, utilizing VPM wall wrap and Knauf Earthwool batts. Each installation was completed on schedule for every request and met high-quality standards.

## HOYTS CINEMA, QLD

We supplied and installed 30m<sup>3</sup> of Rigid 33/45 Pour Foam to fill the internal and external kitchen and dining area walls of this cinema. This was done as a vermin-proof solution, ensuring compliance with Safe Food Australia AS 4674-2004. As part of the installation, we carefully carried out all necessary drilling and patching, delivering a seamless finish with minimal disruption.

## MINERAL RESOURCES ONSLOW, WA

The tight timeline of this project required us to efficiently coordinate and stay ahead of schedule. Through strategic planning and execution, we not only met but comfortably surpassed all deadlines. For this project, we installed R2.0 Polyurethane Spray Foam as an underfloor insulation solution to the floor chassis of 400 pods at the Mineral Resources Luxury Resort in Onslow.

Our streamlined process and advanced installation techniques allowed us to complete the insulation swiftly and efficiently, maintaining and surpassing the construction schedule.

The R2.0 Closed Cell Foam provides superior thermal insulation, ensuring that the transportable homes retain heat more effectively in cooler climates while staying cooler in warm weather.

The use of medium density polyurethane foam made sure nothing detached during transport, requiring no remediation on site.

We are ready to discuss your next project requirements.
